NASA Astronaut

Astronauts are up to 2 inches taller while they are in space. This is due to lack of spinal compression by gravity.

Les astronautes sont jusqu'à 5 cm plus grands lorsqu'ils sont dans l'espace. Ceci est dû à l'absence de compression de la colonne vertébrale par la gravité.

La altura de los astronautas aumenta hasta 5 centímetros durante su estancia en el espacio. Ello se debe a que la columna vertebral no sufre la compresión que la gravedad causa sobre ella.
