This diagram illustrates step 18 of the LEGO building process. It shows a perspective view of a partially constructed model. The main structure is built from red 1x3 and 1x5 bricks, forming a rectangular frame. A black 1x10 plate is being placed on top of the red frame. A green arrow points to a yellow 1x2 brick being inserted into the top of the red frame. The base is a black 1x16 plate with a '02' label. The structure has a green and white grid pattern on the front wall.
