NASA Hubble Space Telescope

If you could see as well as the Wide Field and Planetary Camera on the Hubble Space Telescope, you would be able to read the fine print on a newspaper one mile away.

Si vous pouviez voir aussi bien que le champ large et la caméra planétaire du Télescope Spatial Hubble, vous seriez capable de lire les petits caractères d'un journal à une distance de 1,6 km.

Si tu agudeza visual fuese equivalente a la de la cámara planetaria y de gran angular con la que cuenta el Telescopio Espacial Hubble, serías capaz de leer la letra pequeña de un periódico a un kilómetro y medio de distancia.
